

## FJ LAUNCH

# FOOTJOY INTRODUCES ALL-NEW THERMOSERIES COLLECTION TO AW'22 APPAREL RANGE DEDICATED TO MAKING EVERY DAY PLAYABLE

FootJoy continues its unrivalled support for golfers to Make Every Day Playable following the unveiling of its Autumn/Winter Performance Apparel range.

Building on the success of last year's HydroSeries outerwear launch, the evolution of FJ's performance apparel collection continues with ThermoSeries, designed specifically protect golfers against colder weather.

ThermoSeries includes a range of garments all designed to be worn in conjunction with each other featuring the latest technological innovations to provide thermal protection against the elements without compromising performance on the course.

Built with FJ's single minded focus on the golfer, ThermoSeries has been developed from concept to execution with the European winter and cold weather golfer at the forefront of each garment's design.

## THERMOSERIES™

### THERMOSERIES HYBRID JACKET

The brushed back jacquard knit fabric provides the golfer with the fleece-like luxury feel and uses a cire finish to offer contrast and material interest through its matt aesthetic. An adjustable collar with chest and open hand pockets delivers practicality and comfort.

**PVC: 165 €**

### HYBRID MIDLAYER

A staple garment in any golfer's year-round wardrobe, the ThermoSeries midlayer uses a super soft, two tone Jacquard knit fabric for ultimate feel with rubber zipper and logo elevating the contemporary look. Moisture wicking and UV protection ensure that the ThermoSeries midlayer equips the golfer no matter the season.

**PVC: 135€**

### VEST

The ThermoSeries vest defines the range with a traditional look elevated through technology and richness in detail. The stretch, knit section down the back of the garment enhances mobility through the swing, while the subtle jacquard hex pattern adds visual interest and great material feel.

**PVC: 145€**

### TROUSER

The ThermoSeries Trousers features a tapered fit and stretch fleece fabric providing quality aesthetics and feel. A DWR finish protects the golfer in light rain, whilst the gripper waistband prevents a tucked shirt from riding up.

**PVC: 149 €**

### BASELAYER

Key to creating warmth without bulk, the hex jacquard fabric of the baselayer creates small ridges sitting off the skin, allowing air to circulate and preventing overheating on the course in changeable conditions. The raglan sleeve construction and golf compression fit ensure freedom of movement throughout the golf swing.

**PVC: 79€**

Across the ThermoSeries range there's a neutral colour palette with a base of navy and charcoal mixed with blue, grey and white stone to deliver versatile outfit options across the entire FJ range. To complement the colour combinations FJ focussed on adding different patterns and textures to the fabrics to add a rich, premium look and feel when up close.

## HYDRO SERIES™

Elsewhere in the AW'22 collection, the HydroSeries range welcomes bold new colours to energise the most complete Outerwear range in golf. The three panel construction of the HydroTour introduces striking sapphire, deep red and charcoal tones to make a statement piece both in aesthetics and performance fit for the harshest of conditions. The same colour palette is replicated through the lightweight protection of HydroLite, and the versatile HydroKnit.

All three jackets will be accompanied by respective trouser offerings to provide a protective suit.

**HYDROTOUR™**  
PART OF THE  HYDRO SERIES™  
PVC: 299€

**HYDROLITE™**  
PART OF THE  HYDRO SERIES™  
PVC: 199€

**HYDROKNIT™**  
PART OF THE  HYDRO SERIES™  
PVC: 195€

## COLD WEATHER PROTECTION

The multi-purpose AW'22 range is complemented by FJ's authentic cold weather protection garment options which is headlined by FJ's first puffer-style jacket. The Active Insulation Jacket with patent-pending and vertical elasticated stretch panels across the back of the golfer merges lifestyle fashion trends with golf performance to ensure precision and comfort when teeing it up.

The range will also introduce a new Thermal Hoodie alongside enhancements to the FJ Hybrid Jacket and a range of new colours to its midlayer offering.

**ACTIVE  
INSULATION JACKET**  
PVC: 245€

**THERMAL  
HOODIE**

PVC: 125€

**RIBBED  
CHILL-OUT XP**  
PVC: 135€

**FULL-ZIP  
LINED PULLOVER**  
PVC: 199€

## WOMEN'S

FJ continues to build its momentum in women's apparel with a range dedicated to the needs of female golfers. The range is headlined by a new HydroLite Jacket (SRP: £165) with matching trousers (SRP: £120) in neutral and seasonal colour options.

A new Hybrid Jacket offers an alternate outerwear option with an elegantly soft stretch jersey knit fabric and insulated panels delivering top quality thermal retention. While the popular Insulated Reversible Vest, offering two looks in one, returns with new colour options for a lighter weight outerwear or layering option.

Complementing the vibrant layering options for outerwear garments includes a Jersey Quilted Midlayer, Houndstooth Midlayer, Full-Zip Lined Pullover and a Full-Zip Hoodie, which provide a variety of seasonal looks utilising comfortable and warm fabrics, suited to both on and off course wear.

### COLIN MYNOTT - FJ PRODUCT MANAGER, EMEA SAID:

"This year's Autumn/Winter range continues the brand's apparel momentum and is a testament to our team's dedication to the golfer, and golf specific innovations that has taken products, throughout the range, to new performance levels.

"The complementing designs of the ThermoSeries, developed specifically with the European climate in mind, coupled with our HydroSeries collection, deliver a myriad of options to both protect and support the golfer's performance throughout the year, as we strive to Make Every Day Playable."
